

2007 ANGUS FUTURE

BULL & COW SALE

Friday December 14th, 2007 @ 7PM

Lynchburg Livestock Market in Lynchburg, VA

- 42 Registered Yearling Bulls
- 12 Registered Open Heifers
- 13 Registered Cows
- Commercial Sale to Follow

FEATURING 12 REGISTERED BULLS FROM THESE TOP Sires & MORE

Rito 112

GAR Retail Product

Bon View New Design 208

Dear Friends:

We invite you to join us for our 8th annual "Angus Future" registered bull & bred cow sale. We are excited about this year's offering. The pedigrees are stacked, the performance numbers are solid, their condition is excellent, and the bulls simply look the way they should.

This has been another year of improvement for us here at Phelps Creek Angus Farm as we continue to make advances in our breeding program. We have continued to successfully use embryo transfer, add solid herd sires, and rely on the breed's best genetics from Select Sires for our AI program. We are committed to acquiring complete performance data including ultrasound testing. Culling by strict standards is still important, and we only keep and sell the best that we have.

In addition to our registered herd, we continue to work on our commercial program. Angus influenced cattle is in high demand, and the positive traits that black angus bring to a herd are well documented. We have many top quality pure bred and angus/gelbvieh commercial cattle available for sale at all times.

We hope you will share our commitment to quality genetics and join us for our 8th annual "Angus Future" registered bull and bred cow sale. As always, we welcome you to visit Phelps Creek Angus Farm in Brookneal, VA. Thank you for your continued support, & we look forward to seeing you in Lynchburg, VA on the 14th of December.

Walt & Jenny Foster

PHELPS CREEK ANGUS FARM
2007 "ANGUS FUTURE" BULL & COW SALE
FRIDAY DECEMBER 14th @ 7:00 PM
AT LYNCHBURG LIVESTOCK MARKET

Sale Day Phone:
434 821-5956
(Lynchburg Livestock Market)

**42 Registered Yearling Bull Lots
12 Registered Open Heifer Lots
13 Registered Cow Lots**

Auctioneer:
E. B. Harris

Sale Contacts:

Watt Foster Jr. (Phelps Creek)
Ed Metcalf, Matt Fariss, Duane Gilliam (Lynchburg
Livestock) 434 821-5956
Dr. Peter Fulper, Veterinarian 434-656-8232
Scott Reiter, Extension Agent
Norm Vincel, Select Sires 540-483-5123
Dave Whitlock, Select Sires 540-392-5693

Phelps Creek Farmers:

Roger Morton – Herdsman 434 610-5854
Mark Gregory 434 610-3764
Keith Bomar 434 665-4113
Barn Phone 434 376-3102

Sale Location:

Lynchburg Livestock Market – Rt 29, 4 miles South
of the Lynchburg Airport. Take a left onto 685 at
stoplight (@ Foster Fuels Convenience Store), then
take an immediate left onto Livestock Road.

*Buyers unable to attend may participate by phone by
calling the Lynchburg Livestock Market at 434 821-
5956 prior to the start of sale.*

Terms and Conditions:

The cattle sell under the standard terms and
conditions as recommended by the American Angus
Association. All cattle are to be settled for sale day
unless prior arrangements have been made.
Registration certificates shall be transferred at
expense of seller.

We'll keep him until you're ready:

Bulls can be brought back to our farm and fed for
\$2.00 per day.

Herd Health:

Two weeks prior to weaning, the bulls were given
Vira Shield 5 + L5, Vision 7 /Somnus. Three weeks
after weaning, the bulls were given BovShield 4 +
L5, PMH, IVOMEC.

Trucking:

Trucking will be available on sale day. We will
establish fees on a per head basis.

Phelps Creek Cattle Viewing:

Sale animals may be viewed at Phelps Creek Angus
Farm. Phelps Creek farm is located on Route 501, 5
miles North of Brookneal.

Local Accommodations:

All of these hotels are within 10 minutes of the
Lynchburg Livestock Market, and also very
convenient to restaurants, River Ridge Mall,
Lynchburg Regional Airport, and Highways 460 and
29. For more information about Lynchburg, call us
or visit www.lynnburghonline.com

American Angus Association - Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Growth

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Carcass

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value Indexes

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

\$Value indexes, are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Ultrasound

Intramuscular fat EPD (%IMF), is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

Ribeye Area EPD (RE), is a predictor of the difference in square inches of ultrasound ribeye area of a sire's progeny compared to the progeny of other sires.

Fat Thickness EPD (FAT), expressed in inches, is a predictor of the difference in ultrasound fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

It's Prime Time For Angus Genetics.

The only way to get the genetics that can improve the performance, carcass quality and profitability of your herd is with Angus. A registered Angus bull can help you manage birth weights, improve calving ease and boost carcass quality in your calves. Angus or Angus-cross females offer you fewer calving problems, exceptional milking ability, lower maintenance costs and can produce more pounds of weaned calf per cow exposed. It's time for something better than black. It's prime time for Angus genetics.
